Ms Patricia A Ross
4829 W Montara Cir
Las Vegas NV 89121

Sirs:

I have written several times about Yucca Mt. That was all before Sept 11th.

This should impact on you, the importance of not putting all the nuclear waste in one spot plus hauling it across country. If there were sabotage in any way, not only would Nevada be gone but this would create an enormous problem for the whole world.

I am asking you to look beyond money. Your decisions create the world your children will live in.

I am saying no to Yucca Mt or any site when all the waste is stored.

Nuclear material is made impotent in salt water. Why hasn't this been thought of?

Thank you

Patricia Ross
