18 MS. CHRISTY: Renee Christy. R-E-N-E-E,  
19 C-H-R-I-S-T-Y.

20 I've been a resident of Nevada for 18 years.

21 I have seen how the nuclear energy industry has been  
22 trying to force this down our throats and it's wrong.

23 We don't produce any nuclear energy in Nevada. There  
24 are other processes that are being used in Europe that  
25 could easily be imported to the United States that are

0021

1 much safer than transporting nuclear waste across the  
2 country. There is no reason to use a recently active  
3 volcano that sits on top of our water table that would  
4 cause us great harm in our development as a community  
5 if it was ever to leak, and the reality is there is no  
6 such thing as foolproof. That's it.
