Subject: comments with regard to the Yucca Mountain Preliminary Site Suitability Evaluation  
Part of Records Package / Supplement / Correction

Dear Ms. Hanlon:

I am writing to ask that the Department of Energy recommend to President George Bush that the site at Yucca Mountain, Nevada be designated the national repository for high-level radioactive waste and spent fuel.

I have reviewed NEI's comments on the Yucca Mountain site recommendation and I agree that the site has been as technically analyzed as it is possible to do to ensure that high-level radioactive waste can be safely and permanently stored there.

The results of DOE's work indicate that public health and safety can be protected at Yucca Mountain.

I support continued forward movement in the process to remove the spent fuel currently stored at dozens of facilities all around the country to one location which has been proven safe for the construction of a long-term storage facility - Yucca Mountain.

Best Regards,

Ray Termini
