Subject: Yucca Mountain Preliminary Site Suitability Evaluation

Part of Records Package / Supplement / Correction

Dear Ms. Carol Hanlon:

Please do what you can to ensure that the Department of Energy recommends the Yucca Mountain site to President Bush for high-level nuclear waste.

Having worked for over 25 years in the nuclear business, and having been licensed at Zion Station, I am well aware of the hazards and the needs of nuclear power. Further delay in the use of Yucca Mountain would be a case of the perfect being the enemy of the good. Yucca Mountain appears to be the best choice of all of the alternatives. While it may not be perfect, it is essential, since our country needs the benefits of nuclear-generated electricity. Certainly, using Yucca Mountain is far safer than the current practice of storing spent nuclear fuel at every commercial nuclear plant site.

Please move this process forward by recommending Yucca Mountain to the President.

Sincerely yours,

Xavier Polanski
