Dear Ms. Hanlon:

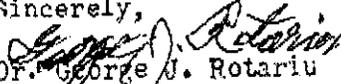

I've been disturbed over the years that no positive action has been taken concerning the country's storage of nuclear material at Yucca Mountain Site. To date there has been no evidence to discredit the use of this Site for the permanent repository of radioactive waste.

Now, something has changed, namely the aftermath of September 11. The need for optimum security ! At present high level radioactive waste is stored at more than 70 sites around the USA. Now, wouldn't it make more sense, security-wise, to have to keep a close watch on one site rather than on over 70 sites????

This country is now pushing for greater and greater security, and in this vein I very strongly recommend and urge that positive action be taken with respect the Yucca Mountain Site. Politics be damned at this point. Let's use some common sense.

Thank you for your consideration.

Sincerely,
