Dear Ms. Hanlon:

I am writing to ask that the Department of Energy recommend to the President that Yucca Mountain, Nevada be designated the national repository for high-level radioactive waste and spent fuel.

At this time of heightened national security due to terrorism, the years of effort spent on siting a national disposal facility will pay off with the enhanced security of storing high-level radioactive waste at one location. Considering that the Yucca Mountain site meets or exceeds requirements for storage of high-level radioactive waste, the Department of Energy should recommend the Yucca Mountain site to the President.

Sincerely,

Elmore Falb
