

Astragalus cimae M. E. Jones var. *cimae*CIMA MILKVETCH

FAMILY: Fabaceae, the legume family.

STATUS:

USFWS/ESA: none. STATE OF NEVADA: none. BLM: none. USFS: none. NNNPS: watch list.

POPULATION CENSUS (NEVADA): 2 occurrences mapped at 1.0 km (0.6 mi) separation, OR 3 occurrences mapped at 0.16 km (0.1 mi) separation; total estimated individuals 151+, total estimated area unknown. TREND: unknown.

IMPACTS AND MAJOR THREATS (NEVADA): No summary available (see references).

INVENTORY EFFORT (NEVADA): Not yet systematically surveyed in Nevada. Most recent entered survey 1983, average year of last survey 1979. Years since last entered survey (percent of mapped records at various survey ages): 11-20 yrs: 33.3%; 21-30 yrs: 66.7%.

LAND MANAGEMENT (NEVADA) in decreasing predominance: Humboldt-Toiyabe National Forest, U. S. Bureau of Land Management, Native American lands (?).

RANGE: Mineral and Nye counties, Nevada; also in CA. Maximum Nevada range dimension 180.9 km (112.4 mi).

ELEVATIONS RECORDED (NEVADA): 5100-6416 feet (1554-1956 meters).

HABITAT (NEVADA): Dry, open, relatively barren calcareous gravel slopes or clay hills.

PHENOLOGY: flowering spring. Range of most frequent survey months: May-June.

LIFE-FORM AND HABIT: perennial herb.

DESCRIPTION: not available (see references).

PHOTOGRAPHS: none known.

ILLUSTRATIONS: Barneby (1989).

OTHER GENERAL REFERENCES (listed separately): Barneby (1964), Hickman (1993).

NEVADA RARE PLANT ATLAS

INDEX TO MAPS AND FACT SHEETS

(8 August 2001)

This index lists all plant taxa on the Nevada Natural Heritage Program's at-risk and watch lists, whether or not included in the current Nevada Rare Plant Atlas. Atlas fact sheets and maps are available and linked for over 80% of these taxa. PLEASE NOTE THAT INFORMATION FOR SOME SPECIES MAY BE INCOMPLETE OR OUT OF DATE. Please read the atlas text sections for further information on the sources and limitations of the data represented on the maps and fact sheets, and for general references cited only in brief in the fact sheets. Fact sheets are saved in PDF format and require the free Adobe® Acrobat® Reader plug-in if not already installed on your system. Images, when available as links from our images page, are indicated with a link to that page, following which you must scroll manually to the species of interest. Updated maps and fact sheets will be generated and posted as time and resources permit, as the data comprising them are constantly being generated and updated.

Map Printing and Display: Due to storage limitations, the map images linked to this web page are **not** reproduced at their original printed resolution (600 dpi in 8.5x11 inch format). They are instead produced at 105 dpi (dots-per-inch) resolution, which results in grainy but acceptably readable output when printed or displayed. When you click on a map link, the first image that displays is formatted for best printing results, even though the screen display may appear degraded. To best approximate an original printed version: change the page set-up or format in your browser to eliminate all headers and footers and change all margins to their smallest possible value, then print pages 1 to 1 of this version. Recent versions of MS Internet Explorer or Netscape browsers printing to laserjet printers should work well. If you wish to view the map in its **best display quality on your screen**, simply click anywhere in the first map image and you will receive a second image at maximum available resolution.
