1 { Depositing our country's nuclear waste at Yucca mountain is an unacceptable action to take. What worries me most are the problems that would be caused by fault lines and groundwater migration. When I first heard about this proposal more than five years ago it did not seem like an adequate long-term solution to our nuclear waste problem and it still doesn't. So I am writing to you as a concerned citizen to stop the Yucca Mountain from becoming a repository for our nuclear waste. }

Thank you,  
Sasha
